ATANAS KAMBITOV

Full-Stack Javascript Developer

I offer over 7 years of professional experience in Full-Stack Software Agile Development using: C#, .NET/.NET Core, EF Core, LINQ, REST APIs, Ajax, SOLID, OOP, MVC, MVVM, SQL, Sql/NoSql Databases, CQRS, Eventstore.

Client-side with: ReactJS, Redux-Saga, React Hooks, Axios, React Native (Expo), Javascript, Typescript, HTML5, CSS3, LESS, SASS, MaterialUI, Bootstrap, Styled-Components, Figma.

Experience with AWS, GCP and Azure, Docker, Kubernetes, DevOps, CI/CD, HashiCorp Terraform, Microservices Architecture, Event Driven Architecture and more.

Currently working in a small Agile team of 5 people strictly following Agile ways of working using Scrum. Following on Solid Principles and Design Patterns. Big Fan of Refactoring, Pair Programming, BDD, TDD, Clean Code, Clean Architecture, Component Design Principles.

PROFESSIONAL EXPERIENCE

FULL-STACK SOFTWARE ENGINEER

Auderli | Brighton, United Kingdom

15/11/2021 - NOW (2 YEARS)

Frontend Development

ReactJS, React Hooks, Typescript, Redux, BDD with Cucumber, Prettier, JS and TS Linters, Pre-commit hooks with Husky, Styled components Formik validation, and more... Testing with Jest & React Testing Library. Experience with CMS projects. Mainly with Gatsby, Netlify CMS and Bulma for styling. Solid understanding of Mobile Development with React Native, using Expo both for IOS and Android apps.

Backend Development

C# and .NET Core, using CQRS and Event Sourcing for managing events. Working with EventStore, SQL, TSQL, Azure Cosmos and Redis Cache as databases. Behaviour Driven Development and Test Driven Development. Testing with NUnit, XUnit & Specflow for specification testing (Given, When, Then). Using Assert First Technique Mocking objects with NSubstitute. Experience with SQL and MySQL.

Cloud and Infrastructure as code

Constantly working with Azure and Azure DevOps, managing YAML Pipelines, NuGet Packages as Artifacts, Repositories and deploying cloud resources. Ability to raise entire infrastructure in Azure, AWS and GCP with HashiCorp Terraform. Terraforming mainly VMs, Storage Accounts, AKS Clusters, WebApps, Containers, KeyVaults, Container Registries, SQL Databases, Static Web Apps etc. Using Traefik for managing AKS Cluster routing, ingresses, middlewares, Services and more...

External services

Auth0 for user identity management.

HubSpot for CRM, marketing campaigns, marketing emails and analytics.

Sentry for error Monitoring and Alerting.

GoDaddy for domain Registrations.

Figma for designing application components.

Google Tag Manager for Marketing/analytics and tags management.

Google Analytics & Heap for tracking.

SOFTWARE ENGINEER

Sainsbury's | Coventry, United Kingdom

03/12/2018 - 15/11/2021 (3 YEARS)

At Sainsbury's I worked on multiple projects mostly with C#, .Net Core, ReactJS, React Hooks, Redux, SQL, TSQL, EF Core, Dapper, MongoDB, Azure, AWS, S3, SNS, Lambda, DevOps, AKS, Docker, Signal R, Key vaults, AAD, Redis Cache, Container Registry, App Services, Azure Cosmos Db, Service Bus, Event Hubs, REST API's, SOAP, OOP and more.

Languages

English
Italian
Spanish
Bulgarian

Managing infrastructure using Terraform, CI/CD pipelines, container orchestration with Docker and Kubernetes cluster. Experience in Microsoft365, Azure, Microservice architecture, Cloud Native Apps, Full-stack development including Unit and Integration testing. Usage of Power BI for reporting and Datadog for monitoring and alerting. Working in an agile way using scrum in a small team of five people providing quality, latency, stability and performance carefully following solid principles and design patterns.

JUNIOR SOFTWARE ENGINEER

SoftUni | Sofia, Bulgaria

05/12/2016 – 21/12/2018 (2 YEARS)

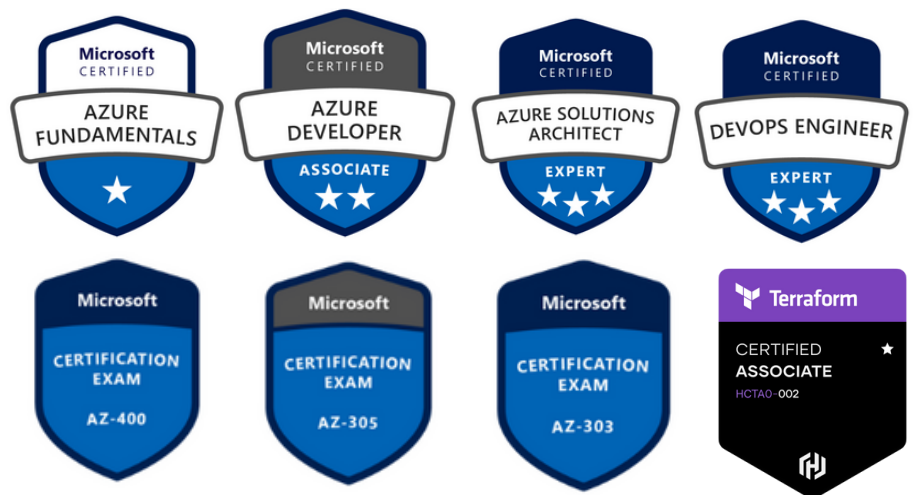

Design and deliver backend RESTFULL API's using .NET Core and NodeJS + ExpressJS. Build and release frontend applications with ReactJS, Angular and Angular 2+. Experience with MVC, MVVM, REST, SOAP XML, JSON, YAML, Git, GitHub and more.

Optimizing SQL queries and working on relational databases with SQL, Dapper and EF Core. Quickly deliver quality code and meet deadlines on multiple projects using different technologies, languages and frameworks.
