Technical Profile

Web Development, HTML5 + CSS3, JavaScript, TypeScript, jQuery, Angular, React.js, Bootstrap, BDD with Cucumber, Prettier, JS and TS Linters, Husky, Styled components Jest, Enzyme, React Testing Library, Mobile Development, React Native, C# .NET Framework, .NET Core, ASP.NET, CQRS, Azure Functions, Redis Cache, EventStore, NUnit, XUnit & Specflow, Selenium, Microsoft SQL Server, SQL, TSQL, MySQL, PostgreSQL, MongoDB, Firebase, Kinvey, Docker, AKS, EKS, CI/CD Pipelines, HashiCorp Terraform, AWS, S3, SNS,

SUMMARY

- Hi, my name is Atanas, I offer 5 years of professional experience in software development.
- Currently working as a Full-Stack Software Engineer mainly with ReactJS, React Hooks, Redux, C# .NET Core, EF Core, SQL Server, SQL, TSQL, MySQL, EventStore, relational/non-relational databases.
- Very passionate about Cloud and Infrastructure using Terraform, building CI/CD pipelines mainly on Azure DevOps.
- Experience in Microservice Architecture, Serverless and container orchestration with Docker and ASK Kubernetes Cluster.
- Love Test Driven Development, Behavior Driven Development, Integration and Unit testing, also, Automated Behavior Testing with tools like Selenium.
- Very strict on Agile methodologies, applying Design Patterns, Solid Principles, also Clean Code and Component Design Principles.
- The goal is to keep learning and growing and getting better as a Full-Stack Software Engineer.

Work History

2021-11 -
Current

FULLSTACK SOFTWARE ENGINEER

Auderli, Brighton

- Currently working in a small team of 5 people following Agile ways of working using Scrum.
- Increased following on Solid & Clean Code Principles, Design Patterns and Component Design Principles. Also, Behavior Driven Development and Test Driven Development.
- Established more working with Azure DevOps for managing YAML Pipelines, NuGet Packages as Artifacts, Repositories and more...
- Frontend development with: ReactJS, React Hooks, Typescript, Redux, BDD with Cucumber, Prettier, JS and TS Linters, Pre-commit hooks with Husky, Styled components and more... Testing with Jest & React Testing Library.
- Experience with CMS projects. Mainly with Gatsby, Netlify CMS and Bulma for styling.
- Understanding of Mobile Development with React Native, using Expo both for IOS and Android apps.

Lambda, Azure Signal R, Key vaults, AAD, Redis Cache, Container Registry, App Services, Azure Cosmos Db, Service Bus, Event Hubs, REST APIs, SOAP, OOP, DevOps, Jira, XML, JSON, Agile, Scrum, Solid Principles, Design Patterns, Behavior Driven Development, Test Driven Development, Netlify CMS, Gatsby, WordPress, PrestaShop, GoDaddy, Microsoft Windows, Git, GitHub, SAS, Figma Designs, Postman, Microsoft Office, External Services, Auth0, HubSpot, Sentry, GoDaddy, PowerBI, Figma, Google Tag Manager, Google Analytics.

Skills

- Web Development
- Mobile Development
- Backend
- Frontend
- Databases
- Testing
- Infrastructure
- Terraforming
- DevOps
- CI/CD
- Agile

- Backend Development with C# and .NET Core. Using CQRS and Event Sourcing for managing events. Experience with EventStore and Redis Cache as databases. Testing with NUnit, XUnit & Specflow for specification testing (Given, When, Then). Using Assert First Technique Mocking objects with NSubstitute.
- Infrastructure: Ability to raise entire infrastructure as code in Azure with HashiCorp Terraform. Terraforming mainly VMs, Storage Accounts, AKS Clusters, WebApps, Containers, KeyVaults, Container Registries and more...
- Experience with External Services: Auth0 - User identity management, HubSpot - CRM, marketing campaigns, marketing emails, analytics Sentry - Error Monitoring and Alerting, GoDaddy - Domain Registrations Figma - Designing application components Google Tag Manager - Marketing/analytics tag management Google Analytics & Heap for Analytics

2018-12 -
2021-12

SOFTWARE ENGINEER

Sainsbury's, Coventry

- Working on multiple projects mostly with C#, .Net Core, ReactJS, React Hooks, Redux, SQL, TSQL, EF Core, Dapper, MongoDB, Azure, AWS, S3, SNS, Lambda, DevOps, AKS, Docker, Signal R, Key vaults, AAD, Redis Cache, Container Registry, App Services, Azure.
- Cosmos Db, Service Bus, Event Hubs, REST API's, SOAP, OOP and more.
- Established an infrastructure management using Terraform, CI/CD pipelines, container orchestration with Docker and Kubernetes cluster.
- Experienced in Microsoft365, Azure, Microservice architecture,Cloud Native Apps, Full-stack development including Unit and Integration testing.
- Increased the usage of Power BI for reporting and Datadog for monitoring and alerting.

Soft Skills

2016-05 -
2018-12

- Working with Agile using Scrum in a team of five people providing quality, latency, stability and performance carefully following Solid Principles, Clean Code and Design Patterns.

JUNIOR SOFTWARE ENGINEER

SoftUni, Sofia

- Performed designing and delivering backend RESTFULL API's using .Net Core and NodeJS + ExpressJS.
- Established builds and releases of frontend applications with ReactJS and Angular 2+
- Experience with MVC, MVVM, REST, SOAP XML, JSON, YAML, GIT, GitHub and more...
- Optimized SQL queries and working on relational databases with SQL, MySQL, Dapper and Entity framework Core and more...
- Quickly increased delivery of quality code and meet deadlines on multiple projects using different technologies, languages and frameworks.

Education

2014-05 -
2018-05

Bachelor's Degree in Informatics: Informatics

SOUTH-WEST UNIVERSITY "NEOFIT RILSKI, PRIVATE SOFTWARE UNIVERSITY - Blagoevgrad, Bulgaria
